HESI $A^2$ Changes Ahead!

If you are applying to El Centro’s health occupations programs which require the HESI $A^2$, take note!

Applicants to the Spring 2013 Associate Degree Nursing class must now take all sections of the HESI $A^2$ (5 sections for that program) in a single testing session and submit their scores on one sheet. No more mixing and matching scores from multiple sheets.

Applicants to all of the other health occupations programs will also follow this policy and take all the sections of the HESI $A^2$ required by their program in a single testing session, and submit their scores on one sheet beginning with applications to the Summer and Fall 2013 allied health programs.

All applicants to El Centro health occupations programs may repeat the HESI $A^2$ as many times as they wish; however, they must take all of the required sections for their program each time they test. Each score sheet must have all scores for the HESI $A^2$ sections on it as required by the individual programs. Only one score sheet should be submitted with application materials.

NOTE: Applicants to Summer or Fall 2012 allied health programs may still submit separate score sheets.
